

Domestic Pesticides Not Requiring a Residential Applicator Certificate (RAC)

Below is a partial list of domestic class pesticide **active ingredients** which do not require a RAC to use. Active ingredients are listed in the *Guarantee Statement* of the pesticide's label.

This list includes products that are used for landscaping and other purposes such as structural applications, mosquito control, pet care, and wood preservation. Vendors do not require a licence to sell pesticides listed in the "Off the shelf" section. •

Pesticides listed under the "Ask your vendor" section are considered safe for use by untrained people. However, vendors require a licence to sell these pesticides and their availability may vary with location.

Off the shelf	Ask your vendor
Insecticide <ul style="list-style-type: none">• boron compounds• d-phenothryn• d-trans-allethrin (also referred to as d-cis, trans allethrin)• fatty acids• insecticides sold and used in tamper-resistant bait stations• insect semiochemicals (including pheromones, kairomones, attractants and repellents)• kaolin• methoprene (mosquito control)• mineral oils for insect and mite control• n-octyl bicycloheptene dicarboximide• octenol (mosquito control)• piperonyl butoxide• pyrethrins• resmethrin• silica aerogel (silica gel, amorphous silica and amorphous silica gel)• silicon dioxide (diatomaceous earth)• soaps• tetramethrin	Insecticide <ul style="list-style-type: none">• <i>Bacillus thuringiensis israelensis</i> (Bti)• <i>Bacillus thuringiensis kurstaki</i> (Btk)• copper (oxychloride and tribasic)• garlic• spinosad
