Domestic Pesticides Not Requiring a Residential Applicator Certificate (RAC)

Below is a partial list of domestic class pesticide active ingredients which do not require a RAC to use. Active ingredients are listed in the Guarantee Statement of the pesticide’s label.

This list includes products that are used for landscaping and other purposes such as structural applications, mosquito control, pet care, and wood preservation. Vendors do not require a licence to sell pesticides listed in the “Off the shelf” section.

Pesticides listed under the “Ask your vendor” section are considered safe for use by untrained people. However, vendors require a licence to sell these pesticides and their availability may vary with location.

### Off the shelf

**Herbicide**
- acetic acid
- corn gluten
- fatty acids
- ferrous sulphate
- plant growth regulators
- soaps
- zinc metal strips (moss control)

**Fungicide**
- sulphur, including lime sulphur, sulphide sulphur and calcium polysulphide

**Molluscicide**
- ferric phosphate

**Rodenticide**
- corn cellulose

**Pet Care Products**
- methoprene
- pesticides registered under the federal Act for application to pets

**Wood Preservatives**
- boron compounds with up to 5% copper for insect control and wood preservation
- wood preservatives

**Miscellaneous**
- animal repellents except thiram
- asphalt solids (pruning paints)
- capsaicin
- insect repellents
- naphthalene for fabric protection
- paradichlorobenzene for fabric protection
- pesticides in aerosol containers
- polybutene bird repellents

### Ask your vendor

**Herbicide**
- citric acid
- iron HEDTA
- lactic acid
- *Phoma macrostoma*
- *Sclerotinia minor*
- sodium chloride

**Fungicide**
- *Bacillus subtilis*
- citric acid
- copper (oxychloride and tribasic)
- garlic
- lactic acid

**Molluscicide**
- ferric sodium EDTA

**Rodenticide**

**Pet Care Products**
- pyriproxyfen

**Wood Preservatives**

**Miscellaneous**
